**NOTICE OF PLANNED SERVICE DISCONTINUATION:
ENGINEERED CENTREX AND ISDN PRIMARY RATE
INTERFACE (PRI)**

Verizon is engaged in a multi-year program to update to next generation network equipment. Consequently, Verizon will discontinue the following services:

Engineered Centrex service, including Foreign Served Centrex (CLNAs).

ISDN Primary Rate Interface (PRI).

This notice applies only to services sold by Verizon Delaware LLC, Verizon Maryland LLC, Verizon New England Inc., Verizon New Jersey Inc., Verizon New York Inc., Verizon North LLC, Verizon Pennsylvania LLC, Verizon South Inc., and Verizon Virginia LLC, Verizon Washington, DC Inc. Services sold by other Verizon companies are not affected by this notice.

Service Discontinuance Timeline:

Verizon will begin a phased discontinuance of these services on or after June 1, 2026. Verizon will provide affected customers with an additional notice at least 90 days in advance of the actual date that services will be disconnected. Circuit additions, moves or changes, including modifications to these existing services will also no longer be supported.

What This Means for You

To avoid any potential service disruption, please review your use of these services and determine whether you wish to migrate to an alternative Verizon product or to another provider. We are happy to work with you to find alternative solutions such as IP Trunking, VoIP Services, or Verizon wireless services.

Additional Information

All changes are subject to any applicable contractual obligations and regulatory approvals. For existing Federal, state, and local Government agencies and educational institutions, modifications to service offerings will continue to be subject to the terms of their contract, the tariff, or the Product Guide (including Network, WITS, local service agreements (LSAs) customers, which are closing out in 2026).

We value your business and look forward to helping you realize the benefits that our advanced offerings can unlock for you. Should you have any questions or would like to discuss alternatives to the service being discontinued, please contact your Verizon Account Manager or call Customer Service at the toll-free number shown on your invoice.

For questions regarding this service withdrawal correspondence, please email the program office at VZProductWithdrawal@verizon.com.

Massachusetts customers can also contact the MA Department of Telecommunications and Cable Hotline, 800.392.6066.

**The New 465 Area Code is Coming to the New York
347/718/917/929 Area Code Region**

To ensure a continuing supply of new telephone numbers, the New York Public Service Commission has approved an all-services area code overlay for the 347/718/917/929 area code region. The 347/718/917/929 area code complex serves the boroughs of the Bronx, Brooklyn, Queens, Staten Island as well as the Marble Hill section of Manhattan. The new 465 area code will serve the same geographic area currently served by the existing 347/718/917/929 area codes.

What is an Area Code Overlay?

An overlay is the addition of another area code (465) to the same geographic region as an existing area code region (347/718/917/929). The overlay does not require you to change your existing area code or phone number, or how you dial your calls. You will continue to dial 11 digits (1+ area code + phone number) for all local calls, as you do today, within and between the 347/718/917/929 and new 465 area codes.

Who will be affected and when does the new 465 area code become effective?

Beginning June 18, 2026, customers in the 347/718/917/929 area code overlay region may be assigned a number in the new 465 area code when they request new service or an additional line. Customers receiving a 465 area code will be required to dial 1+10 digits for all local calls, just as customers with telephone numbers from the 347/718/917/929 area codes do today.

What will you need to do?

Customers in the overlay region should:
Continue to dial 1+10 digits for all local calls, including calls within the same area code.
Continue to identify your telephone number as an 11-digit number, and include the area code when giving the number to friends, family, business associates, customers, etc.
Ensure that all services, automatic dialing equipment, or other types of equipment recognize the new 465 area code as a valid area code and continue to store or program telephone numbers as 11-digit numbers. Some examples are: stored telephone numbers in contact lists in wireless phones, PBXs, fax machines, internet dial-up numbers, speed dialers, call forwarding settings, voicemail services, medical alert devices, safety and alarm security systems and gates, ankle monitors and other similar equipment.

What will remain the same?

Your telephone number, including your current area code.
The price of a call, coverage area, or other rates and services will not change due to the additional overlay.
What is considered a local call now will remain a local call. You will continue to dial 1+10 digits for local calls within and between the overlay area codes, and 1+10 digits for long distance calls.
You can still dial just three digits to reach 911 and 988, as well as 211, 311, 411, 511, 611, 711, or 811 if those are currently available in your community.

Who may you contact with questions?

If you have any questions regarding information provided in this notice, please call Verizon at 1-800-Verizon (1-800-837-4966) or access the following websites for more information: verizon.com/areacodes or the New York Department of Public Service website at dps.ny.gov/contact-us.

Be Prepared for a Power Outage

It pays to use a corded phone. Did you know that during a power outage, a corded telephone can continue to provide phone service where a cordless phone might not? (A corded phone has a handset that is directly wired to the base.) That's because a corded phone doesn't usually need to be plugged into an electrical outlet in order to work. Depending on the service you subscribe to, your corded phones may get power directly through Verizon telephone lines. If you are a Verizon Fios (fiber optic service) customer or a Verizon Voice Link (utilizes wireless technology) customer and have an

on-premise battery back-up unit, your unit will provide power for a period of time in the event of a power outage.

It's a smart idea to keep at least one corded phone in your home and business. That way, if electrical power is lost, you may still be able to make and receive phone calls. A corded phone is also the better choice to protect your privacy when providing credit card information or other sensitive data over the telephone. It's technically possible to intercept conversations or information entered on a cordless phone by using anything from a sophisticated eaves-dropping device to a simple baby monitor. Using a corded phone can help protect your financial information and reduce the risk of identity fraud.

If you have trouble with your Verizon service, report your service issue to Verizon at 1.800.Verizon (1.800.837.4966) or visit [Verizon.com/support](https://www.verizon.com/support).

Important Information Regarding Telecommunications Relay Service (TRS)

TRS provides an operator to telephone users who use text telephones (TTY) or web capable devices (WCD) because they are deaf, hard of hearing, or speech disabled. From payphones, TRS local calls are free; toll calls must be billed to calling cards, prepaid cards (PPC), collect or third-party billing. PPC information is available online at fcc.gov/consumers/guides/prepaid-phone-cards-what-consumers-should-know.

TRS is provided 24 hours a day, 365 days per year with no time limits. For further information call your state TRS Provider, visit the FCC's TRS web site at fcc.gov/consumers/guides/telecommunications-relay-service-trs, or read the explanation available in telephone books. Available TRS methods are explained below.

To call a TTY user, dial TRS at 711. A Communications Assistant (CA) will place your call and type your spoken words for the TTY user. The CA will read to you the messages the TTY user sends you. Calls are private, confidential and uncensored. While there is no charge to TRS users for TTY, regular phone charges do apply.

Speech-to-Speech Service (STS) is another form of TRS available by calling 711. The CA can assume an active or passive role in repeating the conversation and follows the same guidelines as with TTY calls.

IP Relay Service is a form of TRS which relays calls from a WCD. A CA follows the TTY call guidelines. Information on IP Relay is available at fcc.gov/consumers/guides/ip-relay-service.

Video Relay Service (VRS) relays calls for those using sign language. VRS information is available at fcc.gov/consumers/guides/video-relay-services.

Some TRS providers offer Captioned Telephone Service (CTS) which is accessed with a captioned telephone and available for persons with some residual hearing. Also available is IP Captioned Telephone Service (IP CTS) which combines elements of captioned telephone service and IP Relay. Information on IP CTS is available at fcc.gov/consumers/guides/internet-protocol-ip-captioned-telephone-service.

The New 465 Area Code is Coming to the New York 347/718/917/929 Area Code Region

To ensure a continuing supply of new telephone numbers, the New York Public Service Commission has approved an all-services area code overlay for the 347/718/917/929 area code region. The 347/718/917/929 area code complex serves

the boroughs of the Bronx, Brooklyn, Queens, Staten Island as well as the Marble Hill section of Manhattan. The new 465 area code will serve the same geographic area currently served by the existing 347/718/917/929 area codes.

What is an Area Code Overlay?

An overlay is the addition of another area code (465) to the same geographic region as an existing area code region (347/718/917/929). The overlay does not require you to change your existing area code or phone number, or how you dial your calls. You will continue to dial 11 digits (1+ area code + phone number) for all local calls, as you do today, within and between the 347/718/917/929 and new 465 area codes.

Who will be affected and when does the new 465 area code become effective?

Beginning June 18, 2026, customers in the 347/718/917/929 area code overlay region may be assigned a number in the new 465 area code when they request new service or an additional line. Customers receiving a 465 area code will be required to dial 1+10 digits for all local calls, just as customers with telephone numbers from the 347/718/917/929 area codes do today.

What will you need to do?

Customers in the overlay region should:
Continue to dial 1+10 digits for all local calls, including calls within the same area code.
Continue to identify your telephone number as an 11-digit number, and include the area code when giving the number to friends, family, business associates, customers, etc.
Ensure that all services, automatic dialing equipment, or other types of equipment recognize the new 465 area code as a valid area code and continue to store or program telephone numbers as 11-digit numbers. Some examples are: stored telephone numbers in contact lists in wireless phones, PBXs, fax machines, internet dial-up numbers, speed dialers, call forwarding settings, voicemail services, medical alert devices, safety and alarm security systems and gates, ankle monitors and other similar equipment.

What will remain the same?

Your telephone number, including your current area code.
The price of a call, coverage area, or other rates and services will not change due to the additional overlay.
What is considered a local call now will remain a local call.
You will continue to dial 1+10 digits for local calls within and between the overlay area codes, and 1+10 digits for long distance calls.
You can still dial just three digits to reach 911 and 988, as well as 211, 311, 411, 511, 611, 711, or 811 if those are currently available in your community.

Who may you contact with questions?

If you have any questions regarding information provided in this notice, please call Verizon at 1-800-Verizon (1-800-837-4966) or access the following websites for more information: [verizon.com/areacodes](https://www.verizon.com/areacodes) or the New York Department of Public Service website at dps.ny.gov/contact-us.

Customer Notices

Your Choices to Limit Use and Sharing of Information for Marketing

You have choices about Verizon's use and sharing of certain information for the purpose of marketing new services to you.

Verizon offers a full range of services, such as television, telematics, high-speed internet, video, and local and long distance services.

Unless you notify us as explained below, we may use or share your information beginning 30 days after the first time we notify you of this policy. Your choice will remain valid until you notify us that you wish to change it, which you have the right to do at any time. Verizon protects your information and your choices won't affect the provision of any services you currently have with us.

- **Customer Proprietary Network Information**

Customer Proprietary Network Information (CPNI) is information available to us solely by virtue of our relationship with you that relates to the type, quantity, destination, technical configuration, location, and amount of use of the telecommunications and interconnected VoIP services you purchase from us, as well as related billing information.

We may use and share your CPNI among our affiliates and agents to offer you services that are different from the services you currently purchase from us. If you don't want us to use or share your CPNI with our affiliates and agents for this purpose, let us know by calling us any time at 1.866.483.9700.

- **Information about Your Credit**

Information about your credit includes your credit score, the information found in your consumer reports and your account history with us. We may share this information among the Verizon family of companies for the purpose of marketing new services to you. If you don't want us to share this information among the Verizon family of companies for the purpose of marketing new services to you, let us know by calling us any time at 1.844.366.2879.

Electronic Fund Transfer (EFT)

Paying by check authorizes us to process your check or use the check information for a one-time EFT from your bank account. Verizon may retain this information to send you electronic refunds or enable your future electronic payments to us. If you do not want Verizon to retain your bank information, call 1.888.500.5358.

Service Providers

Verizon NY provides regional, local calling and related features, other voice services, and Fios TV service, unless otherwise indicated. Verizon Long Distance provides long distance calling and other services identified by "VLD" in the applicable billed line item. Verizon Online provides Internet service and Fios TV equipment. Fios is a registered mark of Verizon Trademark Services LLC.

Late Payment Charge

To avoid a late payment charge of 1.5% of your total due, full payment must be received before May 31, 2026.

Services**Bankruptcy Information**

If you are or were in bankruptcy, this bill may include amounts for pre-bankruptcy service. You should not pay pre-bankruptcy amounts; they are for your information only. Mail bankruptcy-related correspondence to 500 Technology Drive, Suite 550, Weldon Spring, MO 63304.
